

Jack Cong

Livermore, California | Senior Product Design & UX Leader

Email: jackcongus@gmail.com | Phone: +1 (408) 593-0338

Executive Summary

Visionary Design Leader dedicated to transforming luxury automotive experiences into global digital strategies. With over 20 years of expertise, I specialize in building world-class design organizations and delivering award-winning production vehicles. Recognized for a unique ability to bridge the gap between premium brand identity and scalable product architecture. Recipient of the [2024 iF Design Gold Award](#) and an early adopter of AI-driven development workflows (Claude Code, React Native) to accelerate innovation from concept to launch.

Core Competencies

- **Leadership:** Global Team Building (0 to 1), Design Operations (Design Ops), Strategic Roadmap Planning, Resource Allocation & Conflict Resolution.
- **Expertise:** Smart Cabin / HMI Design, Software Defined Vehicles (SDV), Information Architecture (IA), Digital Branding, UX/UI Design, User Research.
- **Technologies:** React Native, AI-assisted Coding (Claude Code, Cursor), Figma, Xcode.

Professional Experience

Lucid Motors | Newark, CA

Senior Manager, Product Design | 09/2020 – 04/2026

- **Full-Spectrum Org Scaling:** Successfully scaled the design organization from a 5-person startup group to a **25+ person multidisciplinary department** within 12 months. Built and integrated specialized domains including **Product Design, User Research, Advanced Design, Technical Support, 3D and Motion Design**.
- **Digital Design Production Leadership:** Led and oversaw all digital design production domains, including Digital Information Architecture (IA), Instrument Cluster, ADAS, Infotainment, Driver Controls, Design Systems, and Mobile platforms.
- **Production Excellence:** Directed and driven the end-to-end design delivery for both Lucid Air Production Car HMI and Gravity Production Car Infotainment system. Led the

team to win the **2024 iF Design Gold Award** and contributed to Lucid Air winning the **2022 MotorTrend** Car of the Year.

- **Mid-Size (Earth) Platform & Strategy:** Successfully led and completed the Mid-Size Platform concept design, defining the next-generation digital experience and design language for future vehicle programs.
- **Cross-functional Leadership:** Partnered with Engineering and Software VPs to ensure 100% implementation of innovative interaction concepts through rigorous technical feasibility assessments.
- **Platform Scalability & Efficiency:** Architected with a scalable software design system and Infotainment platform supporting multi-model expansion (Air/Gravity), accelerating subsequent design iteration speeds by 30%+.

BYTON | Santa Clara, CA & China | 02/2018 – 08/2020

- **Foundational IA & 48-inch SED:** Built the foundational Information Architecture from the ground up for the revolutionary 48-inch Shared Experience Display (SED), managing high-density data across an unprecedented digital canvas.
- **Global Org Building (0 to 1):** Established and scaled a 40+ member multidisciplinary global team (UX, Visual, Motion, Research) across Silicon Valley, Nanjing, and Beijing from ground zero.
- **Systems & Ecosystem Integration:** Directed the digital product architecture and global interaction patterns. Orchestrated deep integration with 3rd-party partners (Baidu, Ximalaya), transforming external services into a cohesive, native branded experience.
- **Strategic Governance:** Partnered with C-level stakeholders and VPs of Software/Hardware to define product strategy, ensuring 100% design accuracy and safety compliance throughout the production cycle.

Telenav | Sunnyvale, CA & China

Senior Manager, Global UX Design (Founding Designer) / 2003 – 2018

- **Scale & Impact:** Directed HMI/Navigation design for **Ford (Sync 3)**, Cadillac, and GM. Managed products for **20 million+ subscription users** across AT&T, Sprint, and T-Mobile.
- **Founding & Global Growth:** Joined as **Founding Designer**; architected the **world's first mobile connected navigation system (v1.0)**. Built and led the China UX organization across 3 locations to support 20+ product launches.
- **Mobile Pioneer:** Led the high-stakes transition from PND to smartphone ecosystems (iOS, Android, BlackBerry), establishing the company's mobile market leadership.
-

Innovation Projects

LinkSteps (Founder & Lead Developer)

Architected and developed a React Native mobile application using AI-driven toolchains (Claude Code) to connect seniors with families through real-time health data monitoring, focusing on sensory protection and "Care-Coordination".

Education & Awards

M.S. in Computer Science Northwestern Polytechnic University, Fremont, CA | 1999 - 2001

B.S. in Computer Science Beijing Institute of Business Administration, China | 1987 - 1991

Awards:

- **iF Design Gold Award 2024** – [Lucid In-Vehicle Experience \(LIVE\)](#)
- **MotorTrend Car of the Year 2022** – Design Lead for Lucid Air
